

Work of The Red Cross

Giving Medical Attention to Those Who Live in Remote Districts.

A Red Cross worker in one of the primitive sections of the west made a discovery last summer. She visited a sawmill camp and, while there, discovered two men, one of whom had chopped half his foot off with his axe and was unable to get any treatment for it. The other had suffered a kick in the shin from a mule and the jaw bone was broken. He was unable to get the bone set. Both travelled 30 miles to a place where they hoped to find a doctor and they travelled in vain. When they arrived there they were all in. They were put to bed and remained there until, as in the case of animals, their limbs healed and they were able to get back to their work. The net result of their failure to receive attention at the proper time, or, indeed, at all, is that one will limp badly for life and the other will have a terribly disfigured face.

The Red Cross, organized for peace, will, by its guidance and expert advice, make it possible for all such far away communities to have such like adequate medical and nursing attention by equipping hospitals and nurses' quarters and providing suitable surgical and medical supplies for the treatment of all such and similar cases, whether of accident, disease or what not.

Not only that, but the Red Cross aims to give lessons in first aid to the sick and injured and to teach people who, by reason of the nature of their occupations, must live far from medical and nursing aid, just what they should do in all such cases who come within the scope of their influence.

The Red Cross, it is realized, is needed now more than at any other time in the history of the country, and it is earnestly hoped by those who are endeavoring to organize the humanitarian forces of the world that Western Canadiana, by its far men and women, boy and girl, will join the Red Cross when the campaign is on from June 5 to 11.

Will Help Campaign To Fight Hoppers

C.P.R. Will Have Police Laid Down Along Railroad Right-of-Way.

The C.P.R. will assist the campaign to squelch the grasshopper this year by laying down police along the railroad's right-of-way through affected areas; it is stated by Thos. Adcock, general agricultural agent of the C.P.R., in a letter to E. H. Hedley Auld, deputy minister of agriculture.

Mr. Adcock states that if the municipalities will provide the police to the section foreman at cost, instructions will be issued to foremen to distribute the bait, the work to be done by the section gangs under the supervision of the Government officials in charge of the general campaign.

In the opinion of the officials of the Department of Agriculture, the grasshopper menace promises to be as serious this year as last, though the centre of attack may be slightly changed, some of the older districts badly infested last year being now free of the pest, while it is expected that some districts comparatively immune last year may have to be prepared for a strenuous attack.

Letter: Evil.

Bill Collector—"But, why do you let your wife spend all your money?" Mr. Hennecke—"Because I'd rather argue with you than with her!"—American Legion Weekly.

Only are found all the world over.

CUTICRA HEALS ITIMLES

In terrible rash on face which made skin sore and inflamed. Irritated itching scratching and weeping. Could not sleep well and made feet unpleasant. Trouble finally subsided before used Cuticra and after using 2 cakes of Cuticra and 1 of Ointment skin was completely healed.

From signed letter of Miss Gladys Nesbitt, R.R. 3, Brimacombe, Ont.

Cuticra Soap, Ointment and Talcum powder and maintain skin purity, skin comfort and skin health often when all else fails.

Send 25c, Ointment 25c and 50c. Sold by all druggists. L. J. Paul St. Montreal, Quebec, Canada.

OLD STANDBY, FOR ACHEs AND PAINs

Any man or woman who keeps Sloan's handy will tell you some thing

ESPECIALLY for rheumatism. A counter-irritant, Sloan's Liniment soothes the congested and inflamed muscles, relieves the aching joints and soothes the inflamed skin. It is a sure remedy for rheumatism, neuralgia, sciatica, and all the troubles of the muscles and joints. It is a sure remedy for all the troubles of the muscles and joints. It is a sure remedy for all the troubles of the muscles and joints.

Sloan's Liniment (Patented) (Made in Canada)

North Offers Canada Great Opportunity

Laird River Will Produce More Than The Yukon.

In 25 years, with an efficient development programme, J. T. Burns, engineer, geologist and Yukon pioneer, believes the northern country will be producing \$500,000,000 annually. "Canada's great opportunity lies in the north," he stated.

"I have spent 20 years in the Yukon," Mr. Burns continued, "and have panned it from one end to the other, so I may be said to know the Yukon as well as most old sourdoughs. But from what I have seen of the Laird River and its head streams I am convinced that for production it could outdo the Yukon."

Mr. Burns is urging construction of a railway from Stewart into the Laird country about the confluence of the Deane and Frances Rivers, and thence north to Fort Norman or east to Fort Simpson, at the confluence of the Laird and Mackenzie. This road, he points out, would not only tap the newly discovered oil fields, but would open up the Greenwood coal country and the placer gold and quartz district west of Fort Simpson.

The Portland Canal, Mr. Burns insists, is the logical outlet for the mineral products of the Mackenzie River basin, and he backs up his contention by reference to the map. From Stewart to Fort Norman is approximately 625 miles, 275 miles less than from Edmonton to Fort Norman. From Stewart to Fort Simpson is approximately 500 miles, 120 miles less than from Edmonton to Fort Simpson. In addition to this, Stewart is at tidewater, while Edmonton is hundreds of miles away from it.

America's Champion Typist

Has a Speed Record of 265 Words a Minute

Miss Rose L. Fritz, America's champion typist, has been telling a New York interviewer that her speed record was set as much to her as a big concert to a musician or a football game to an athlete. For 15 years Miss Fritz has been in the training. She takes physical exercises, walks a great deal, eats only the simplest food and sleeps regularly. Unless she were in perfect condition her record might "go back" on her. She started her high-speed career when she was only fifteen. A manufacturer of typewriting machines happened to visit the typewriting school at which Miss Fritz was a pupil, and was struck by the rapidity of her work, which was due to her adoption of the touch system. She was asked to come to his office and exhibit her powers, and as a result the company offered her a three-year contract to operate and demonstrate their machines. Since then she has won forty championship trophies. Her extreme speed record is 265 words a minute, but that, she explains, was done on short words and on material which she knew. In transcribing new material she has sometimes written as many as 155 words a minute.

Farmers Come From U.S.

Elmer Woodcock, of Joliet, Illinois is one of the vanguard of the springing flow of farmers from across the line. He has staked his claim in the country to the extent of \$50,000, which he has paid for a section of land near Swiftburg, Minn.

Good Goods Wanted.

Too many Canadian manufacturers have been riding upon the tail of the U.S. goods for years. If they would make a good article, brand it, and advertise it, the problem would be solved. —FARMER'S OWN.

Athens, the Greek capital, enjoys bright sunshine on an average of 200 days in the year.

A Matter of Color

College Boy Did Not Get Ahead of Gardener.

An American writer tells a story of his college days. It relates to a negro gardener, with whom the boys used to have considerable sport. One day in spring, Sambo had been burning the college green in order to get rid of the old withered grass. A fresh green was coming, and, thinking to have some fun, he asked, "Say, there, Sambo, you ought not to burn that stuff." "Why?" inquired Sambo. "Because," replied the freshman, "I'll make that grass as black as Sambo." "Well, massa," retorted Sambo, "dat's all right. Dat 'ers grass 'll come up and be as green 'as you are!"

Nine hundred and ninety-seven cutting tools alone are required in manufacturing a modern rifle. The twist drill is one of the busiest of these. To supply 1,000,000 drills 94,000,000 holes must be drilled.

WIND ON THE STOMACH Quickly Relieved

It is a good thing to know just what to do when gas belching starts. One suffers in the following experience: "A few months ago I ate some green beans and vegetables, and found that was not quite ripe. It brought on indigestion, hiccupping, nausea and cramps. I belched gas continually. A neighbor urged me to use 'Bismarck.' I took it and found it sweetened water and got quick relief. I will never again be without this valuable remedy. Nowville is a householder, necessarily, large 35c bottles sold everywhere."

Think Airplane is Bird

Frightened Natives Hide in Timber

There are even yet in remote parts of the world people who never even heard of an airplane. Some of these people live in the little Navaho village of Gigaote, where the naval plane NC-6 was forced down by a hurricane while on its flight from San Diego, Cal., to Panama, along the coast of a dozen other places, in January.

They thought the NC-6 was a huge bird, an albatross, which had come in search for some unfortunate mariner who had offended it and they hid in the forest for several hours.

Unfit to Live—Must Die

This verdict is rendered a thousand times every week—no corn can live, then from Edmonton to Fort Simpson. Extractor is applied to corns and warts. Use the old reliable "Pain-killer" it never fails, 25c at all druggists.

Planes for Mounted Police

Recommendation is Made that Riders of the Plain Should Now Travel By Sky Route.

If plans now projected work out, the old idea of red-coated riders of the plains dealing over the country on horseback, or mushing along over the long trails with huskies and sleds is due for a revision. Instead, in the not far distant future, mounted police are due to arrive at outside posts by airplane, thereby being enabled to enforce the "white man's law" to the natives in the farthest north, covering in a few hours their patrols which now take as many days.

In the report of the commissioner of the Royal Canadian Mounted Police, tabled in the house by Hon. J. A. Calder, Commissioner Perry says a request has been made to the air board to share in an air service to Fort Norman from Peace River and back summer. "The force," says Commissioner Perry, "has placed at the disposal of the board suitable quarters at Peace River and storage and accommodations at all posts down the Mackenzie."

"I anticipate an extension of 1000 miles to other points in the north-west territories, which are very remote and difficult of access."

Select Laxative Medicine With Great Care

In debility and weakness, no druggist should be asked for laxatives. Many pills and purgatives are too harsh and do more harm than good. Excessive action is always followed by depression, and, knowing this, Dr. H. H. H. has devised his pills of Aloes and Hintner so as to mildly laxative and build up the system. Many pills and purgatives are too harsh and do more harm than good. Excessive action is always followed by depression, and, knowing this, Dr. H. H. H. has devised his pills of Aloes and Hintner so as to mildly laxative and build up the system. Many pills and purgatives are too harsh and do more harm than good. Canada Should Not Export Raw Material

No Reason Why Country Cannot Manufacture More at Home.

Some years ago Ontario exported her raw materials to the United States, where they were sawn into lumber. Quebec exported her pulpwood to American paper mills. During her raw pulpwood into paper, with the result that a huge lumber, pulp and paper industry has been built up in this country.

A somewhat similar situation now exists in connection with some of our mineral products. For example, Quebec, which has 85 per cent of

the world's asbestos, last year exported over \$11,500,000 worth of the raw material, sending it to the United States, Great Britain, Japan, France and other countries. It is estimated that this crude asbestos would be worth \$41,500,000 if it were manufactured at home. In Ontario we used to export our nickel ore in its raw state, but within the last few years we have been refining the ore at home.

There is no reason in the world why we should not manufacture more of our raw materials at home instead of sending them out. Sawlogs, pulpwood, ore and various other commodities should be refined by ourselves. In other words, we should build up our basic industries and not depend for essential industries on foreign lands.

The Hague is one of the handsomest cities in Holland.

Half of all the lead pencils in the world are made from American-grown cedar.

Rheumatic Pains

Are relieved in a few days by taking 30 drops of Mother Seigel's Syrup after meals and evening. It dissolves the lime and acid accumulation in the muscles and joints so these deposits can be removed, thus relieving pain and stiffness. Seigel's Syrup, also known as "Laxative and Blood Purifier," contains no dangerous or harmful drugs to alter or make the pain of rheumatism or lameness. It removes the cause. 50c a bottle at druggists.

Increased Acreage.

An increased acreage of 500,000 acres is expected to be sown in wheat in the province of Manitoba this spring. Indications are for the early opening of agricultural operations. The season has been especially favorable, and farmers are getting their machinery in order for operations.

All fish eating birds have their beaks slightly curved at the end to prevent their prey slipping away.

RED CROSS

In Peace or in War—The One Universal Emblem of Sacred Motherhood, watching over Mankind. Counting neither cost nor Sacrifice. Measuring only Service and Devotion.

In time of peace, all over civilization, the Red Cross, drawn by great need, has consecrated itself to the task of active, vigilant, comprehensive service to these high ideals:

THE IMPROVEMENT OF HEALTH. THE PREVENTION OF DISEASE. THE MITIGATION OF SUFFERING THROUGHOUT THE WORLD.

In Manitoba, in Saskatchewan, and in Alberta, the Red Cross has undertaken broad and effective programmes that will not only lead to these ends, but will in their progress and accomplishment make our communities better places to live in, brighten our lives, improve our material welfare, and help weld all the people of our prairies into a brotherhood of common sympathies.

And so also in all the other Provinces of our Dominion, and in every land and clime that knows the crimson badge of mercy.

UNIVERSAL MEMBERSHIP ENROLMENT Western Canada Dates, June 5-11

Red Cross is not asking that you pour gifts of money into her lap at this time—excepting only a nominal membership fee of One Dollar; but it proposes to lay before the citizens of the west its programme and its peace policies, point out the need for its helping hand, and ask every man, woman, and child during that week to subscribe to its creed, enlist in its ranks; to join the Red Cross, enroll his or her name, and become a member of the Society.

And this is also a call to every citizen who can and will, to give their service to the organization, to assist in the work of personally extending to every individual the opportunity and privilege of this membership.

Notify your Local Branch or advise your Provincial Headquarters:

CARSELAND NEWS & NOTES

The P. R. Club held its May meeting at the Church on Thursday, the 26th, with an attendance of fifteen members and four visitors.

The greater part of the afternoon was given up to the regular business, among which was the arrangement for the second payment on the piano that the Club bought during the winter. At the last meeting it was arranged that each member earn a dollar for the fund. In this way the ladies took in twenty-two dollars, and the recital of the ways and means resorted to to fulfill the promise provided an amount of amusement.

The club decided to take over five weeks of canvassing Canseland district members for the Red Cross Society and the following ladies will act, with Mrs. R. Bishop as secretary: Mesdames Crumphy, Field, Fortney, Cook, Cook, McIndy, Gardner, and Tuckaway. These ladies will be given special districts to work in, and any member is asked to report any person missed in the canvass.

Blind Creek comes under the Canseland district and the ladies aid at that place is being asked to undertake the canvass of their district.

Mrs. Crumphy, Mrs. Gardner, and Mrs. Cook presided over the tea cups.

Mrs. H. C. Gardner extended an invitation to the Club to meet at her home for the June meeting.

Mrs. Bishop is to receive a letter from Briz, General H. F. McDonald, Campaign Director of the Canadian Red Cross Society, saying that arrangements have been made with Mr. Walsh, having picture shown, to have the R. C. film shown in various places in Alberta and that he intends to call at Canseland in the course of a few days to make arrangements to show the film at Canseland.

At the regular meeting of the Board of Trade a committee was appointed to make arrangements for improving the pump property. It was proposed to lay two pipe lines across the foot of the ground, one toward the street and another to the rear, as the water is rough, to be connected by main ground hydrants. When this is effected it will enable the pump to work generally between the hydrants at any time water. It is also proposed to fence off the property. It was decided to protest to the Department of Public Works against the proposal to connect the Blind Creek territory with Bladell's property. This measure was brought to the notice by the meeting by a letter from Blind Creek. The matter was left in the hands of the president.

Much interest was caused by the invention of Mr. Harper's remedy after on Friday when he began work in the City of the canyon. The operation of mine, a Ford car, a barrel, parts of a timber, and a few wheelbarrows, and a square lot of the business on hand. Every man to his own job and the way about in the highway handled the wheelbarrows, indicated that some work has been done by the village.

Congratulations to Mr. Mike Brown for putting a few nails in the sidewalk near the drug store. A little more work would put even the old walk in shape that would not be dangerous for both children and adults.

KEOMA ITEMS

Word has been received by the secretary of Redington, indicating that from Edmonton that the taxes for that district are to be raised ten per cent.

Authority has been received by the Keoma school district to enlarge its area on the north so as to bring in applicant funds to carry on the school in the village.

In the late evening last Tuesday week the coal shed at the Keoma school was destroyed by fire. The place was all ablaze before it was noticed, and it was only a miracle how the school was saved, being less than ten feet away. It had not been in the smartness of the volunteer fire department of fifteen, in the village, that school would have gone up in smoke. It got rather badly scorched. A quantity of coal and a big pile of kindling wood was destroyed. The origin of the fire is unknown, and no insurance was carried.

Miss Fennel, who was in the fire at the school, is more seriously hurt than was previously thought.

John Parks is making rapid recovery after the bad scalding he received some weeks ago.

Clara Park had a large rusty nail run nearly through her foot. The wound is giving her some anxiety.

All the wheat in the district is up fine, and all other seedling is 75 per cent finished.

The splendid rain at the end of last month in the Keoma district went into the ground either inches will very much help germination and ploughing.

An x-ray shows that Ray Douglas's leg is broken in several places. He is in the Holy Cross Hospital.

Miss E. Bradsher is to attend the Junior Convention of the C.P.W.A. in Edmonton next week.

Last week a serious accident befell one of the C.P.R. regulars at Keoma. It appears that after he left the water-master's headquarters with a load of greenfeed, he stopped on the road side to give the horses a feed at midday. When he had done so, he took the bridge off, and at that moment a car came along and started the train. As soon as it is known, he tried to hold them and in doing so, he got either trapped or so shaken, with the result that his leg was badly smashed, his back and arm hurt, and two ribs cracked. The body was rushed into camp on the evening train of the C.P.R. where he is situated for his recovery.

While here Mr. and Mrs. Wainwright did all that was possible for the suffering.

The C.P.R. are making extensive repairs in the big ditch east of here.

A meeting of Strathmore School Board was held on Thursday evening, some routine business was taken up. Matters at the schools seem to be progressing very satisfactorily, three teachers holding of a conference were before the Board.

Mr. E. B. Zerk, who has been recuperating in California for some months past, is making a satisfactory recovery from his illness.

An endeavor is being made to build a dental here. There is no doubt that a permanent dentist is badly wanted, and the right sort of man would be assured a prosperous future.

The business man who finds his way into parliament, first becomes an orator and then a politician.

CROWFOOT NOTES

The French school is closed at present because of several cases of measles in the district.

The service which was to have been given last Friday evening at Junior was postponed until Monday.

Mr. and Mrs. James Gordon, of Calgary, attended church at Crowfoot Sunday.

When looking to registered in the district. The first arrived is now up several inches.

The new and nice which will on Friday was very welcome.

Mr. and Mrs. E. England, Miss Hobbie and Ellen England and Messrs. Adolph England and Oliver Grimes spent Sunday with Mrs. H. Scher and daughter.

Mr. H. G. Scher and Mr. Clarence Garriot are practically recovered from a severe attack of pneumonia.

Miss Katy Stockie took dinner Sunday with Mrs. R. West.

Mr. and Mrs. Lee Haymond visited Sunday with Mr. and Mrs. Fred Schuman.

It is planned to start the sports club about June 1st.

Since the fire, the club finances are in splendid shape. A couple of new tennis nets are being purchased.

The tax notices for the town of Strathmore are now out, and they will not be received exactly with shouts of joy by the property owners. A discount of ten per cent is offered on payment of taxes by June 7th.

Rockford is now the fortunate possessor of two newspapers, Mr. W. C. Blount having put in a plant there and commenced publication of the Rockford Budget. The other paper is printed by the enterprising publishers in Calgary, newspapers (7) purporting to represent the interests to Rockford, Canseland, Irricana, and various other places.

The publication of a free local newspaper, the Calgary syndicated (and copyrighted) press will last as long in Rockford as it will in the other points. We wish Bro. Blount every success.

The Calgary Daily Herald

a Newspaper for Everyone in Town or Country

THE HERALD is a great family newspaper. Its editors always keep this point in view. Its daily and weekly features embrace almost every important phase of human endeavor. Its special departments for women and children are most complete.

AMONG the most important of its new features is the provincial page chronicling local happenings all over the province.

THE HERALD maintains a large staff of special town and country correspondents to keep and make this news live and up to the minute.

Inevitable Results of Colonization

The settlement of unoccupied farm lands near to existing railways by the Western Canada Colonization Association and cognate agencies will certainly bring, says the manager, Gen. A. D. McIlroy.

For the Local Farmer

- (1) A permanent advance in the sale of his land.
- (2) Better wagon roads because there will be more people to pay for them.
- (3) Improved social conditions and a richer community life.
- (4) A reduction in the school taxes, or more efficient schools without any increase in the rate.
- (5) The conversion of straggling midwestern into prosperous communities.
- (6) The checking of gophers, weeds, and other "wild land" pests.
- (7) An ever-growing power for the agricultural interest in the nation.
- (8) More favorable marketing, purchasing, elevating, and storage conditions. (Against such positive advantages it is idle to raise the bogey of lower prices through increased farm production. The crops of Western Canada will never determine world quotations on food stuffs.

For the Local Merchant

- (1) More customers from the country; more motors in front of their stores.
- (2) A growing town trade.

For the Local Land Man

- (1) More sales of farm lands.
- (2) A freer tendency in town values.

For the Local Newspaper

- (1) An increasing town and country circulation.
- (2) More advertisements and a mounting revenue.

For the Village and Town

- (1) An enlarged municipal outlook; a new civic pride.
- (2) Better streets, sidewalks and buildings.

For the Nation

- (1) A steady reduction in the deficit on the National Exchequer.
- (2) A progressive easing of the burden imposed by the National Debt.
- (3) A new confidence and faith in the future of the Dominion.

DEMONSTRATION OF ALBERTA BEEF CATTLE

That Alberta Government is sending about sixty head of its high class beef cattle to England this summer for the purpose of demonstrating there the quality of the animals raised in the province. The shipment will be a mixed lot of Aberdeen-Angus, short-horn and Herefords. The Hon. Duncan Marshall, Minister of Agriculture of Alberta, says "This idea is to establish friendly relations with the breeders and sellers over there and to advertise Alberta as a good stock raising country. No one has really any kind of kind of stuff we can produce in this country. The breeders of purchased animals there are afraid that we shall swamp the market. Nothing of the kind. They will find that for every bull they can sell over there they will be able to sell ten in Canada once we have our grade lands settled. It is going to make business instead of killing business." Mr. Marshall explained that under the embargo law in Great Britain the animals will have to be slaughtered within ten days. It is his intention to get together members of the breeders' associations and others to see the cattle. At the end of ten days the cattle will go to the block. The best will then be followed to market, and also as closely to the consumer as possible to see how it is appreciated. As many butchers as possible will be asked to bid on the animals.

Bidding advertisements enable you to get more for your money because they tell you where, what and when to buy. And it is a well known fact that advertised goods are more reliable and better value than the unadvertised kinds.

Many few people get indigestion from swallowing their pride.

The shakes and jare of life send one man up and another down. Our culture—the size of soul and breadth of vision—determines the course we are to travel.

For violating the liquor laws, an Iowa, Mich. man was fined \$100 and sentenced to attend church every Sunday for a year. Good, that's getting them kind.

Canada Needs More People

In the development of the natural resources of Canada, and the resultant increase in traffic for the transportation systems of the Dominion, it is not the only permanent solution of the problem now presented by the annually recurring, and increasing, deficits in the operation of the National Railways. This was the view expressed in this column last week, and further study of the question only serves to confirm and strengthen that opinion.

It is gratifying to note, too, that the soundness of this suggested solution is being urged more and more upon the Federal Government and the people of Canada. Such influential men as Hon. T. A. C. Greer, President of the C.P.R., Sir Frederick Williams Taylor, general manager of the Bank of Montreal, and other leaders in Canadian affairs, support this view.

If it is in the development of our natural resources lies the solution of our railway problems—and if increased business will solve the railway problem it will likewise assist to solve other national problems of transportation—then the question presents itself as to which of our many resources attention should first be turned as best calculated to quickly respond to well directed Government and individual effort. Also, in the light of existing world conditions, which of our resources will make the strongest appeal to the people of the world? Again, which of our resources, if more fully developed, will react upon and operate to bring about the development of other resources?

There can be no question as to the richest, the most important, the basic natural resources of this country. It is to be found in the agricultural lands spread over the Dominion from the Atlantic to the Pacific. Valuable as are the mines, the forests, the fisheries of Canada, and necessary as they are to the upbuilding of a strong and self-contained nation, they individually and collectively take second place to agriculture.

The first essential to the development of the untitled areas of Canada's fertile agricultural lands is population. Without people the lands must remain idle and unproductive. Lacking workers on the land, crops cannot be produced. Unless our unsettled lands are peopled with workers who will produce, and through their production create traffic for the railways, all the economies in the world will not result in making those railways profitable.

Furthermore, it is only through the placing of people on the land that the necessary demand will be created for manufactured products of all kinds, the demand for which will, in turn, force the development of our mineral and timber resources, and thereby create still further traffic for the railways and provide employment for an ever increasing body of artisans and skilled workers in shop and factory.

Another million of people settled on farms in Canada and producing wealth from the soil would result in such a volume of produce for export in the shape of grains and livestock that many of our now unprofitable lines of railway would become paying propositions, because for every dollar's worth of produce shipped out, the people on the land would purchase a dollar's worth of goods to be shipped in.

Yet there are people in this country who are advocating the adoption of the most stringent regulations to prevent immigration into Canada. Nothing could be more shortsighted. All will agree that the bars should be kept up against the mentally, morally and physically deficient. Canada does not want such as these, who are not producers, but who become a menace and burden to the state. But Canada does need and must have a large increase in immigration of the right type of people if it is to develop and prosper.

The most prosperous period in Canadian history was during those years when immigration was the dominant factor in the development of our country and the vast lands of the Dominion were being brought under cultivation. Those were the years when, with the incoming of these pioneer settlers, our cities, towns and villages grew apace; our railways were busy and constructing new branch lines; our manufacturers were constructing larger factory buildings and employing many more workers; and activity was manifest in the development of natural resources of all kinds. With the falling off in immigration, and with large national obligations incurred for transportation and other services which were provided to meet the expected continuation of the influx of new settlers, the slump came. Then the war put a stop to all immigration for over five years, while at the same time it took its toll of the population.

The opportunity again presents itself to secure a large volume of immigration to Canada, and immigrants of the right type. Now, sound national policy demands that full advantage be taken of the opportunity. If there ever was a time when Canada needed new people to assist in the development of our great resources, it is now. Immigration should be encouraged, and there should be no trouble in selecting and eliminating the small percentage of undesirable as the port of embarkation. The great majority of immigrants come to Canada to better their condition, and have a fairly clear idea in mind of what they are going to do. They should be encouraged to come, and a helping hand and all reasonable assistance and a warm welcome extended on their arrival.

Picture Film 15 Miles Long

A motion picture film, 15 miles in length, and which requires nearly 24 hours for continuous exhibition, has been completed at the studios of production has incurred some of the principal incidents in the Bible from the Creation until the birth of Christ.

Insatiable Birds

There Wasn't Much Left for the
Shipper After the "Ducks" Got
Through With It.

A new story is going around the financial district about an old southern negro who was asked by the proprietor of a store how he happened to need credit when he'd cash a good cotton crop.

"He ducks got 'bout all dat cotton, sah," was the unworldly reply.

"What do you mean the ducks got it?"

"Well, you see," explained the old man, "I sent dat cotton up to Memphis and deducts the freight, and deducts the storage charges, and deducts the commission, and deducts the taxes—yes, sah, de ducks got 'bout all dat cotton an' dat's why I'm here."—Boston Transcript.

THANKFUL MOTHERS

Once a mother has used Baby's Own Tablets for her little ones, she will use nothing else. The Tablets give such results that it is almost nothing but words of praise and thankfulness for them. Among the thousands of mothers throughout Canada who praise the Tablets is Mrs. M. A. Anderson, of Regina, S.S., who writes: "I have used Baby's Own Tablets for my children, and from my experience I would not be without them. I would urge every mother to get a box of the Tablets in the house." The Tablets are a mild but thorough laxative which regulate the bowels and correct on the stomach; drive out constipation and indigestion; break up colds and simple fever and make feeding easy. They are sold by medicine dealers or by mail at 25¢ a box from The Dr. Williams Medicine Co., Brockville, Ont.

Won't Be Observed.

A bill abolishing tipping, gratuities and perquisites may be introduced in Parliament. The idea of such a measure will receive approval from a lot of people who will disregard it. There is ground for the contention that tips are extortions that add to the cost of what has been well paid for. They are few, however, who will venture to live up to their theories. The average man is a coward and when confronted by a custom—Montreal Gazette.

TOBACCO HEART

Every Smoker Knows This

Tobacco does not seem to affect all alike. Many men enjoy their smoke like a good old age, and apparently suffer no ill-effects from the use of the weed.

There are others, though, on whose heart and nervous system tobacco produces the most serious results. It causes palpitation, pain in the heart, and irregularity of its beat, weakens the hands, causes dizziness, nerves on edge, and causes shortness of breath and loss of sleep.

To counteract this demoralizing influence on the heart and nerves there is no remedy so equal, so safe, so reliable as the use of Miller's Heart and Nerve Tonic.

The tonic has been long and steadily, restore tone and vigor to the nerves, and remove all the evil results caused by the tobacco.

Mr. D. McKillop, Cochrane, N.S., writes: "I was using four much for tobacco, and got so I could not sleep at night, nor handle anything, and I suffered terrible from pains in my heart. I told a friend about it, and he advised me to get your Miller's Heart and Nerve Tonic."

Price 50¢ a box at all druggists or mail order direct on receipt of price by The T. Miller Co., Limited, Toronto, Ont.

Coal has been found valuable in the best Portland cements, the iron, discoloring the ware.

Unless worms be expelled from the system, no child can be healthy. Mother's Worm Expeller is an excellent medicine to destroy worms.

A Mountain Wilderness

Jasper Park is Largest Big Game Sanctuary in World.

Jasper Park, east of the Yellowhead Pass through the Rocky Mountains, traversed by the Canadian National Railway, has an area of 4,800 square miles. It is, therefore, a little more than twice the size of the province of Prince Edward Island.

Jasper Park is an immense mountain wilderness, partly unexplored. It contains unclouded mountain peaks, glaciers, meadows, canyons and many lakes; also Mount Robson, the highest known peak in Canada. It is the largest big game sanctuary in the world.

It has been estimated that one ton of water could be made to yield 60,000 horse-power and another 50,000.

All things will for these who come after them.

Minard's Liniment For Burns, Etc.

Good Profit in Poultry

Alberta Farmer Who Kept Record Shows that Money Can Be Made Out of This Side Line.

An example of the profits that may be made with poultry on western prairie farms is given by W. E. Decker, who farms near Bassano, Alta. On Jan. 1, 1920, he had 29 six farm two hundred and fifty-eight White Leghorn hens. From these hens they obtained and sold eggs to the value of \$656.81. They used and set eggs to the value of \$283.90. They also sold \$105.79 worth of chickens and the value of the poultry they used at sale was \$10.14. This makes a total of \$1,060.14. Against this feed to the value of \$73.99 was bought, and about \$50 of grain raised on the farm was given to the hens. The net profit, therefore, amounted to \$786.15—not a bad return from a side line.

The flower of the Mohammedan religion is the violet.

Canada Not Trading With Belgium

Has Lost Opportunity Says Agent General of Quebec.

That Belgium is a completely neutral country of Belgium and so lost the opportunity to capture the Belgian market, was the statement of G. W. Langlois, agent-general of the province of Quebec in that country, speaking before the Chamber of Commerce. Mr. Langlois declared that one of the 300 United States and English agents who gathered in Brussels after the armistice there, was a single Canadian. He had tried to get a Canadian bank to establish a branch there, but his efforts were unavailing.

He pointed out that New York was selling Canadian goods in Belgium and making their big profits on them. He had taken steps to remedy it even the Canadian dollar was not listed on the Brussels stock exchange.

Cardston Irrigation Project

Alberta Government Will Irrigate Area of 15,000 Acres.

The Alberta Government consulting engineer, D. W. Hays, has just completed an examination on behalf of the government of the United Irrigation District, which has been formed for the purpose of irrigating about fifteen thousand acres of first-class arid and arid Cardston in Southern Alberta.

Mr. Hays says the project is quite feasible, in fact, the only proposition he has ever met with. There are no difficulties to surmount and the construction work can be carried out without any large or expensive machinery. It is expected that work on this project will be begun this summer.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

City and Rural Population.

The New York Tribune is authority for the statement that in the United States there are 51,318 cities having a population of at least 25,000.

For years I have never considered my stock of household remedies complete unless a bottle of Holloway's Corn Remover was included. I have used it so often recently that I am sure of its value. I find it a very useful in the highest sense to all who have a hard corn, large or small. I find it a sure way in saving against all the painful and dangerous methods of cutting and burning.

And as to that very many instances prove its value. A recent experience in removing a corn was compared to be a lot of a valuable corn remover has again demonstrated its great worth and promises me to recommend it in the highest sense to all who have a hard corn, large or small. I find it a sure way in saving against all the painful and dangerous methods of cutting and burning.

A real treasure, good for me or my feet.

CHAS. H. HOLLWAY, N.S.

Effective Plan to Destroy Hoppers

Flame Throwers in France Meet Success in Exterminating Locusts.

How the flame throwers of the French army provided large quantities of freshly roasted meat for the country of the locusts, and the time taken the fields of crop-destroying grasshoppers and locusts is told by Dr. L. H. Howard, chief entomologist of the U.S. Department of Agriculture, who recently inspected insect-fighting methods of that country. The hoppers were swept into great heaps by living circles of soldiers and then exterminated by the flame.

Feet That Never Touch the Floor

A worn floor spoils the look of your home and is impossible to repair. But if you keep your feet from touching the floor—let the paint wear but save the wood. Save the floor and you save all.

SENOUR'S FLOOR PAINT

It keeps you, close your feet with a high finish and will withstand the roughest traffic. It is the only floor paint that cannot be scratched. It is the only floor paint that will not be scratched. It is the only floor paint that will not be scratched.

There is a SENOUR'S FLOOR PAINT in every home. It is the only floor paint that cannot be scratched. It is the only floor paint that will not be scratched. It is the only floor paint that will not be scratched.

SENOUR'S FLOOR PAINT

Save the surface and you save all—And it's genuine

Solid, one-piece cast-steel frame.

Its solid, one-piece cast steel frame makes an engine block solid as concrete. There is no bend, no twist to this frame. It always holds the parts in perfect alignment, and when it is necessary to put on new parts, they always fit perfectly. The tremendous twists and strains of a rough field do not harm the Hart-Parr 30.

You'll need a Hart-Parr more than ever this year

Experience is the best teacher we have in everything and that is why we selected the Hart-Parr tractor as the one we wanted to sell. It is built by the "Founders of the Tractor Industry." Back of it are twenty years experience in building tractors; twenty years learning how and why; twenty years digging out and perfecting improvements that have made the Hart-Parr 30 a leader as a powerful, sturdy tractor, simple enough for the farmer to drive, adjust and expert.

Farmers are going to need tractors more than ever this year. The reason is because he is not going to get war prices for his crops and he must raise them cheaper to keep his profits where they belong.

We'd like to talk it over with you. Show you what other Hart-Parr 30 owners have done and show you why it is the best tractor value on the market.

A Hart-Parr 30 will cut your production costs. We know it—we can prove it.

If you can't come in soon, write or telephone for a catalogue, but come in as soon as you can.

H. J. ANDERSON AND SON

Strathmore Phone 67

Story of the old tractor that drove the first combine in the world. We have the original of the first combine in the world. It was built in 1880.

WHEN TO PLANT SUNFLOWERS

During the past summer, the department of agriculture in Alberta carried out a series of very interesting experiments as to the manner of seeding sunflowers so as to produce the best yield. In view of the great interest that is being taken in this new plant throughout the Canadian prairie provinces and the north-western states, the results obtained will be of great value to numerous dairy and stock men.

It has been found that the difference between seeding on spring and fall plowing is very small—fall plowing having a slight advantage. To get the best results the land, too, should be fairly dry. The experiments showed that highest yields were obtained from land sown about May 31st. For these tests plots were sown at seven day intervals from May 14th to June 10th, the crops harvested increasing from 30.87 tons to the acre, seeded on May 14th, to 35.66 tons when planted on May 31st, decreasing to 31.99 tons to the acre on June 10th.

The heaviest yields were obtained when drilled in rows thirty inches apart. In districts, however, where the rainfall is not so heavy during the growing season, it might be advisable to have the rows slightly further apart. The plants should be thinned out with a hoe from four to eight inches apart.

"ONCE TO EVERY WOMAN" TO BE SEEN HERE

American theatregoers who revolved in the dramatic wealth of "The Heart of Humanity" and captivated to the irresistible qualities of "The Right to Happiness" are doubtless of the opinion that in these two phenomena Dorothy Phillips and Allen Holubar, star and director, have reached the heights of screen perfection. That the public is asked to reserve its final verdict until it has had a view of "Once to Every Woman," the newest Universal Jewel production coming to the Opera House on Friday, May 21.

The popular appeal of "Once to Every Woman" is heightened because it deals with every day people and treats of a theme that is as old as humanity. Modern love is its keynote, and it shows the utter vanity of worldly ambition when not founded on human affection.

Miss Phillips first appears as a school girl, the daughter of a village blacksmith, who because of her good looks and sweet voice, is the pet of the family. She accepts the sacrifices of her parents and siblings, and when a visitor from New York offers to send her abroad to have her voice trained she leaves home with no regrets.

After many dramatic episodes she finally reaches the goal of her ambition—the creation of the star role in a new grand opera in New York. Her humble home and family are forgotten. Then a tremendous shock causes the loss of her voice. Her new found friends and admirers leave her. In her mother's great love she finds real happiness at last.

Prominent in the star's support are Robert Anderson, William Ellington, Dorothy Valentine, Emily Chichester, Elmer Field, Mrs. Margaret Mann, Mary Wise, Dan O'Rourke, Ross, Gene, Frank Elliott, Katherine Griffith, Emma Gordon and many others.

Times are hard in many states of the Union but are the advertisers cutting down their campaigns? The result of the questionnaire sent out to members of the Association of National Advertisers showed that for 1921:

65 per cent. will spend more,
20 per cent. will spend the same,
15 per cent. will spend less.
"I have captured many a good idea," said John Wanamaker, "because I acted before the idea got past."

If the thought of the things you want and haven't got keep you from thankfulness, turn your eyes around and be thankful for the things you would not want to have and haven't got.

Some people bathe frequently, and some compromise by using perfume. The Police Gazette is now banned from Canada through the customs department.

— Contributions —

In cash or notes, to the Strathmore War Memorial Hall will be gladly received by the secretary of the G.W. V.A., H. H. Forward, local returned men, and other citizens or at the office of the Standard.

Rockyford Making Many Improvements

The Rockyford Council has made a start on the grading of the village streets, and when the work is completed the village will have streets which will be a credit to our progressive village.

For the last few days work has been in progress on that portion of Main street lying between First street and the government road allowance to the north. This portion has been completed in a manner that is a credit to those doing the work.

Second street, Railway street and the balance of Main street will also be graded in the near future.

The village council has installed a flow and more powerful pump at the village well, and the citizens can now procure their water supply there.

Contractor Pease is busy erecting the fence around the lot on which the village well is located. This is a decided improvement.

It is understood that the village council will shortly discuss the question of building some new sidewalks in the village.

ARDENOTE NOTES

Mrs. H. Gohard and daughter May and Mrs. J. Gohard and son Henry were Calgary visitors for two days this week.

This doesn't keep our members from attending the U.F.W.A. meetings as quite a number were present at the meeting held with Mrs. Jesse L. Booth. The members present were: Mrs. Freeman, president; Miss Mary Gohard, secretary; Mrs. James, Mrs. Dawson, Mrs. Pease, Mrs. Thompson, Mrs. Chamberlain, Mrs. Sealey, Mrs. H. Gohard, Mrs. Keane, Mrs. O. R. Booth, Mrs. Horvick, Mrs. J. L. Booth, Mrs. Galt, Mrs. J. Henderson and Mrs. R. McCarthy, and one new member Miss Anna James. We certainly are having some lively times. All members who have not been attending would do well to come to the next meeting to see what is being done.

Grandma Hall called on Mrs. O. R. Booth last week.

Mrs. H. Gohard made a business trip to Calgary last week.

The next meeting of the U.F.W.A. will be held at the home of Mrs. Sealey. This meeting will be devoted mostly to the laundry, and that means you will be needed, so let's all honor.

Miss Rose Henderson, of Calgary, is spending the week and with her brother, Mr. J. Henderson.

NEXT WEEK WITH THE CHURCHES

UNION CHURCH SERVICES
Rev. Theophilus, S. T. L., Pastor.
Monday, May 22nd, Sunday School Board of Management. Election of officers the chief business.
Thursday 8 p.m. Choir practice.
Friday 8 p.m. The annual convocation (annual gathering). Reports from the official board, the Ladies Aid and Sunday School will be presented, along with some musical numbers.
A social time and refreshments at the close of the programme. A cordial invitation is extended to the whole congregation.
JERVIS—2:30 p.m. Public Worship and Sunday School.

Strawberry Culture on the Prairie

(Experimental Farm Notes)

Connected with the home in the rural districts there should be a garden, and, where the area of the garden and available labour will permit, a strawberry patch should be included. On the prairie only hardy sorts should be planted at first, later, when the grower has more experience, superior varieties may be tried and the everbearing strawberries grown. At the Scott Experimental Station the Dakota variety has proven much harder than any other kind. It bears runners freely and being quite hardy a good bed of vigorous plants is always maintained. The fruit is of medium quality but is of good flavour. The flowers are "perfect" consequently only the one variety need be planted. In securing plants it is important that they should be ordered and shipped early in the season and it is usually advisable to purchase the stock so that there will be very little delay in transit, as the roots frequently dry out and failure of the plants to start is often due to this cause.

Next is importance to securing hardy plants comes the proper preparation of the soil. Well worked unmerfled soil is preferable, and the strawberry plants thrive better if there is not too high a percentage of clay and if some rotten barn manure has been applied. In the spring, before planting the bed should be worked down: it will become more firm if worked when there is moisture in the soil. It may be necessary to use a soil pocker or roller immediately before planting to bring the moisture level up near the surface. It is important, since the strawberry is a shallow rooting plant and it is essential that the roots be put into the moisture. In setting out the roots should be kept moist by keeping them in damp moss or in a soil with water to cover the roots. The plants, if not fifteen inches apart in the rows, should multiply sufficiently to form a matted row, as this system of growing strawberries is preferable in the west where there is so much wind. The rows should not be closer than four feet and five feet if it is preferred. In planting, the crown of the plant should be at the surface after the soil has been pressed down firm. It is a good plan to remove all the leaves excepting two and to trim all the long straggling roots. In order to encourage the runners to start, bumps of earth or wooden pegs should be used to hold them down close to the earth and to prevent the wind from whipping them around.

If at all possible, the bed should be located where there is some protection from the wind. A Canadian hedge affords excellent protection. In some districts banks of manure are built along the windward side of the strawberry bed. These, in addition to protecting the plants from the winds in the summer, provide a trap for snow during the winter and this affords more moisture for the summer. Winter protection consists in covering the plants with from eight to ten inches of straw. This mulch should be left on fairly late in the spring to prevent blossoms from forming too early and being frozen. The straw should be clean and free from weed seeds, as it is found that the mulch is frequently responsible for the introduction of foreign growth into the strawberry bed.

Clean cultivation is absolutely essential for successful strawberry growing. The bed should be weeded early in the spring and again after the first season is over. If the bed is properly looked after, it will usually bear good crops for three years but it would be as well to permit it to grow, the plant food is soon exhausted, the soil robbed of moisture, and the usefulness of the bed destroyed.

Experimental Station
Scott, Sask.

CARELESS OF THE ONE THING NEEDFUL

(continued from last issue)

But some how he would often find, how weak, he could not tell, the thought would often cross his mind.

"Twas all for little Nell."

If they could only double up

How much more could be done

To lift them out of the old-time rut

Much better two than one.

With supper over, one might say,

"My dearest little Nell."

She smiled and raised her little head;

Then frowned his thoughts did tell:

"My Nellie don't you think, my dear,

That you could learn to milk."

They're quiet cows, you need not fear,

They're sleek and smooth as silk.

She looked at him quite shyly;

Then gave those little eyes a roll,

And said: "I'll have a try."

"I'll help you, Nell, at first," he said,

"Till you get in the way."

Till Nell in sympathy was led

To milking day by day.

She'd milk, she'd churn, and separate

And feed the calves as well.

And other things till evening late,

And Jimmy's little Nell.

And Brown thought they were doing

fine.

His crops were looking grand.

With horses he was making time.

With work upon the land.

Said Brown one day, "My little wife,

I've found some dandy hay.

None such I've seen in all my life,

Its taste without delay.

If you would only take with me

It would not take us long."

For others soon will come you see,

The best will soon be gone."

So Nellie Brown, she labored on,

And on, from day to day.

She'd cook, she'd wash, she'd milk and

churn.

And help to make the hay.

But neighbors knew this could not

last.

For Nell began to fail.

Her system it was breaking fast:

Her cheeks were turning pale.

One day she said to Jimmy Brown,

"Dear Jim, I'm not so well.

And if you're going into town,

The doctor you might tell.

Perhaps as well to send him out.

Hear what he has to say.

I'll soon be well without a doctor.

But I'm so sick today."

When Brown the symptoms he had

told.

The doctor's car, it swiftly rolled,

For Nellie made its haste.

There was no time to waste.

The car, it ceased to roll and roar,

At Nellie's little shack.

The doctor opened the door,

At once was taken back.

His practiced eye saw at a glance,

White Nell was veiled with pain.

To operate the only chance.

And this seemed all in vain.

A rupture, system broken down.

No strength left for the fight.

A week has passed and Jimmy Brown

With sad and weary heart,

All brought about by Jimmy Brown,

Who thought he did the right.

Canadians not so Numerous in U. S.

During the Past Decade the Number of Residents Has Decreased to 90,000.

Washington, April 25.—During the last ten years the number of Canadians resident in the United States has fallen off \$7,500 compared with an increase of 27,000 in the previous decade. According to statistics just given out by the census bureau there are now 1,117,156 Canadians living in the United States. French Canadians number 267,681, and show a loss of 77,402 in the ten years while Canadians of other origins number 849,475, and show a loss of 10,909.

Germany, Austria Ireland and Russia, natives of which made up more than 50 per cent. of the total foreign born population of the United States ten years ago, showed heavy losses, the aggregate falling off being two millions. This result is believed to be due largely to the war with its consequent exodus of belligerent nationals and the stoppage of immigration.

Germany leads as the country of birth of the foreign-born in the United States with 1,042,298. Italy parades second with 1,067,419 and Russia third with 1,238,999. Poland occupies fourth place with 1,219,878, an increase of 195,797 in the ten years, while Ireland is fifth with 1,052,690, Canada comes sixth and England seventh with 812,414, a decrease of 65,305 in the decade.

Sweden continued to hold eighth place with a total of 624,259 and is ninth with 574,959. Scotland has a total of 254,192 and France 152,651. Newfoundland and Australia showed increases.

Beholds them lower his Nellie down

And then the tear drops start.

The world he'd give, could he grant

His darling little Nell.

But she's beyond the reach of pain.

In God's own flowerly field.

Don't blame poor Jimmy Brown, my

traveller.

He thought he acted square

And now, could he but make amends.

Himself he would not spare.

Life's struggle blinded him to all

The happy might have been:

That now lies far beyond recall.

Let's not forget the verse.

Now farmers, let us one and all,

A lesson from this learn:

While here and there at every call,

Our own cause never spurn.

Now become an active member,

Not just a hanger on.

It's a struggle, just remember.

It will not be a song.

Pray tell me what on earth's the use,

To toil from day to day,

And rack our brains to find excuse

And other fellows grab the dust.

For bills we ought to pay.

That should be yours and mine.

Be men, put up a fight, or bust,

For surely it is time.

Advertising

To every business within the Western Bow Valley Irrigation Block the Standard provides a means of getting in touch with present and prospective customers. It costs less to advertise in the Standard and thus re-educates the public in any other way, and THE STANDARD GOES HOME, whilst the circular is apt in very many cases to be left in the Post Office or dropped on the street.

A business man to succeed must advertise. Newspaper advertising yields the best results of any kind, if you really have something to sell that the public wants, and you keep your ads, readable and up-to-date.

The farmer can use a Standard want ad. to advantage. Our miscellaneous ad. columns are read by every subscriber every week.

Many business men are using the columns of the Standard, and find them effective in bringing results. If you are not now advertising, get us on the phone or write, and we will send rate card and full particulars.

Job Printing

Having a modern and well-equipped plant, comprising over \$8,000 worth of machinery, with type-setting machine, power presses, etc., we can handle any kind of printing at prices equal to any city house, and the quality of our work is always guaranteed. In loyalty to your own district, and to your own best interests, never give a job to a travelling man, until you get our prices.

A few lines which you are, as a business man, bound to require from time to time.

Old Fort Ellis and Sioux Indians

Crossing the Plains to Fort Carlton
Summer 1875.

By O-G-E-MAS-ES (Little Clerk).

(Copyrighted)

The husband of the innocent woman was particularly bloodthirsty and quick with rage. The young boys backed him up and were searching everywhere for a—no, no doubt, he would have gone down with him if his hiding place had not been discovered. Our interpreter asked and he was honest trying to make some sort of settlement that night; they however we "not treat. They would not smoke, not clamored for the empty "smoke" and threaten to burn the house. Our friends. Of course we could not account surrender him to their fear from tender reasons. Next day, by good luck, Chief Factor McDonald returned sooner than expected and there was a Grand Council in the large Indian room of the fort, some forty of the leading Sioux being present.

It was a fine sight and quite an education for us youngsters to see this thin spare Scotchman walking up and down before the assembled warriors and raving them as if they were a lot of school boys. I only remember the general manner of the proceedings which were chiefly directed through an interpreter, though at times he would break into broken Sioux interspersed with Gaelic. The Cree.

The speech follows: "Did you never follow the foot your selves when full of fire water? The woman if not hurt. What is all this fuss about? You wait until my back is turned and then rush in here at night trying to scare everybody." "Did you never follow the foot your selves when full of fire water? The woman if not hurt. What is all this fuss about? You wait until my back is turned and then rush in here at night trying to scare everybody."

"Did you never follow the foot your selves when full of fire water? The woman if not hurt. What is all this fuss about? You wait until my back is turned and then rush in here at night trying to scare everybody."

"Did you never follow the foot your selves when full of fire water? The woman if not hurt. What is all this fuss about? You wait until my back is turned and then rush in here at night trying to scare everybody."

"Did you never follow the foot your selves when full of fire water? The woman if not hurt. What is all this fuss about? You wait until my back is turned and then rush in here at night trying to scare everybody."

Few Wheat Breeds Resist Rust

Great Difficulties of Producing Commercially Valuable Resistant Varieties.

The extreme difficulty of producing a wheat resistant to rust is outlined by W. P. Thompson, professor of biology at the Saskatchewan University, in a paper read at the recent Saskatchewan conference and exhibition on "Breeding Wheat for Rust Resistance."

At the outset, the speaker differentiated between a "rust-resistant" wheat and a "rust-resistant" wheat, which is one which escaped rust by reason of early maturity or other reasons. Up to the present time, varieties that are truly rust-resistant are those which have no commercial value.

The speaker declared that he had tested practically all the varieties for which rust-resistant wheat has been claimed, in addition to hundreds of varieties from nearly every wheat-growing country in the world. "Out of all the varieties tested," said the speaker, "less than a dozen showed true resistance, and of these none are of commercial value, at least unless it be one or two of the Macaroni type, whose drawbacks are familiar."

Practically all the resistant varieties are discolored or stained, and consistently resistant bread wheats have been found.

Dr. Thompson went on to say that the production of a good resistant variety appeared to be merely a question of making enough crosses between rust-resistant and commercial varieties which would have all the other desirable qualities. This was recognized, would be a big task, because the small percentage of resistant hybrids and because of the small percentage of those resistors which could possess the desirable qualities of the wheat parent.

Next December, the tercentenary of the planting of the first potato in North America, will be celebrated. Dr. Lunter said in an address before the American Association for the Advancement of Science, "not as arriving to our right, White Star and Bonanza Streets to our left, and so on; each family in London street having its duplicate in our interminable city, and each house above its corresponding number below. At intervals we find shafts communicating with the upper world, admitting light and air and through them we hear the tramp of feet and the rumble of wheels."

It is not the material rush of a train beneath our feet along a grating we see a busy station far below us.

Housekeeping in Hayti

Nature Provides Food And Does Most of the Work.

Nature not only provides the food in these wild places of the south, but does all the work. Does man with his clean dishes she has but to go up to a calabash tree and cut down the gourds, which grow to enormous size. We have heard of herds of wild asses in the bowls and dishes of the average Haytian household.

Of both in Hayti there are few. A stalk that will grow in a field of the soil is sufficient. A blanket is all most unheard of.

The slaves of Hayti filled the fields another day under the white man's guidance. Left to their own devices, eventually they have let nature take its own course. Hayti is the most primitive agricultural implements are unknown to the rural Haytian of the south.

Grain Inquiry Board

Third Member of Grain Trade Inquiry Board Has Been Appointed.

J. H. Haslam of Regina, has been appointed to sit as the third member of the proposed Dominion board of inquiry into the grain trade. The invitation to Haslam to accept the appointment came in the form of a telegram from Sir George Foster, minister of trade and commerce, to Mr. Haslam replied in the affirmative.

The board will comprise Judge Haydnew, Edmonton; W. D. Staples, Winnipeg, and J. H. Haslam.

Growing Wheat in Alaska.

When the gold rush was on in Alaska a quarter of a century ago no person would have thought of that country as a farming land. Today they are growing a hybrid wheat there—cross between Siberian spring wheat and our Canadian Marquis. A flour mill has been erected and they are milling the grain. Man is moulding the earth—Farmers' Sun.

A favorite delicacy of the Eskimo is a dish of good, bad and even half-hatched eggs, mixed with angelica, crockberries, and thrown into a sea-kill fish filled with white oil.

Every week, within the borders of Louisiana approximately 4000 people, more than 2,500 persons die and 2,600 begin wedded life.

German Propaganda To Sow Dissension Among The Allies

An Underground City

Familiar Streets in London are Found Duplicated Below.

A man may spend the whole of his life in London and yet never see eyes on that wonderful underground city which stretches its maze under the "Babylon of bricks" with which he is familiar, say Tit-Bits.

He has, in fact, without realizing it, been walking over a buried city, with its network of scores of miles of streets.

And yet this silent subterranean London may be explored by anyone who will take the trouble to get the necessary permission.

We descend to our underworld beneath the Holborn Viaduct and find ourselves in a well-lighted vaulted passage, with a walled floor and walls lined with white bricks. Beside us run the pipes of the gas and water companies, troughs containing the city, and each house above its corresponding number below. At intervals we find shafts communicating with the upper world, admitting light and air and through them we hear the tramp of feet and the rumble of wheels.

Germany pleads poverty, but she has at least money enough to keep her political secret service and foreign propaganda departments. Of the latter, one of the latest disguises is "The League of Nations."

With its imprimatur several leaflets in English have been put into circulation through the mails. One of them is especially addressed to churchmen and appeals to all Christians to study carefully "the overwhelming proofs of Germany's innocence and the guilt of the English."

In the matter of the responsibility for the war. It appears that the German Government, on account of its "inexperience and inefficiency in combating falsehood," has not before "taken the proper steps to its upon England and the guilt of the World War."

But now the job is to be done, though. And it is to be done by the simple means of asking, each questioner, "What would the Lord God Christ would have approved of the Great Lie rotting the moral fibre of a whole nation?"

"Britons with a conscience!" For the "American people," Americans thought to be left to light and left, each to his own conscience. But it is not so simple. It is to be done by the simple means of asking, each questioner, "What would the Lord God Christ would have approved of the Great Lie rotting the moral fibre of a whole nation?"

The great work of civilization and commercial development which Germany has carried on in her colonies for the benefit of all the peoples destroyed under British rule through the incapacity of the administration and gross mismanagement. The German also could be expected to the rulers of India and Ireland?

It has been plain for some time that the German propaganda machine has been started on full speed. But it turns out the same old transparently sound products. We simply get further proof of the German inability to understand the mental and moral processes of other nations.

Especially to understand what other people think and must think of the Germans today. Again we have exhibitions of the serene stupidity of the German mind. He is so stupidly honest and often enough you will be believed, and that you to persuade those opposed to his way to begin by looking him in the face.

The whole new effort is obvious. It is to sow dissension among the Allies, and particularly to stir up trouble between the United States and England, or France, or both, by having them in, to help out. But the thing is so grossly stupid and so senseless as to defeat its own purpose—unless that purpose be to excite fresh disgust with German methods.

Five Tragedies

And the Last Was Not the Least or the Mournful Happenings.

A man struck a match to see if it was lit. He found it was not. He was dead.

A man patted a strange bull dog on the head to see if the critter was affectionate. It wasn't.

A man stepped to see if he could beat the train to the crossing. He couldn't.

A man touched a trolley wire to see if it was charged. It was.

A man cut out his advertising to see if he could save money. He didn't.

No Speed Limit in Cuba

Taxi Drivers Very Alert in Avoiding Each Other.

Havana, Cuba, claims the distinction of having solved the problem of cheap transportation in a satisfactory manner without any other city.

Operating within a territory whose radius is little greater than a mile, 8,000 automobiles are on the roads in the circuit for 20 cents. Under no speed limitations, the drivers are left to their own fate, running head-on and forth through the streets, but their feet and hands become so lightly developed that they can swerve out of one another's way more adeptly than can be imagined.

Near a Grandstand you have a dip in an underground bath into which several persons have plunged several centuries ago.

Mixed. A contributor to an English weekly tells of an Irishman who was describing his narrow escape from a cross bull.

"I seized him by the tail," he exclaimed, "and there I was! I was literally held up, and I dared not let go."

"You were between the horns of a dilemma," ventured a lady.

"No, madam. I wasn't between the horns at all, besides, he wasn't a dilemma. He was a Jersey."

In Japan the disposal of the household income is usually left to the wife.

"Yes, father," replied the boy.

"Alright. Now go and see who is banging at the door. It's the landlord, say I'm out!"—Houston Post.

Fish Industry in West

Unlimited Possibilities of Central and Northern Alberta and Saskatchewan.

At the town of Big River, ninety miles west of Prince Albert, one of the largest inland fishing industries in Canada is being built up. Its main product is whitefish, which has achieved a great popularity in the Eastern as well as Western Canadian provinces, and it is also supplying a large market for trout and salmon.

Timothy Seed

\$500,000 Pounds Sold by Growers in the Pincher Creek District.

About 500,000 pounds of Timothy seed has been sold by growers in the Pincher Creek district to the Albert Dickinson Seed Company, of Chicago, at a price of about \$15 to \$16 a pound according to G. M. Stewart, of the Dominion Seed Branch, Calgary. The seed will be cleaned at the government elevator at Calgary and forwarded to its destination. The growing of Timothy for seed has been successfully carried on at Pincher for some years, nominally it is a profitable undertaking as under favorable circumstances the yield is from four to six bushels of forty-eight pounds to the acre while the farmer has the hay in addition.

Lady Visitor—What brought you here, my good man?

Convict—Misplaced faith, lady.

Lady Visitor—Dear me! In a bad woman, I presume.

Convict—No, madam; in a hastily borrowed automobile with a bad engine.

The largest high school building in the United States is a distinction claimed by Hibbing, Minn. for its new school now in course of construction in that city.

"Briggs—'Tomkins is engaged to a widow, I hear.'"

Briggs—"That's just like him. I'm too lazy to do any of the courting."

The Prince and India.

Despite all assertions nothing final has been decided as to the Prince of Wales' visit to India. He is most anxious to go, but the matter will be left to Lord Reading, who in July or August next will inform His Majesty whether the visit of the Dick Arbiter is justious or not. His father or better advice, especially that, decide this momentous question.

Changing Color of Birds.

The color of birds may be changed to white by keeping them in a white room surrounded by white objects and attended by persons dressed in white. It has been done. However, the third or fourth generation is necessary before the bird's feathers are all white.

Say You Saw It In The Standard

"Art and the Child"

The above was the title of a most interesting address given by Rev. McArthur Wilson, minister of Knox Presbyterian Church, Calgary, to an audience that completely filled the comfortable hall. The lecture was under the auspices of Strathmore School and held Thursday evening.

Mr. Wilson, in his address, presented a very novel point of view, though at the same time a very true one, of the child as a potential artist. In the great majority of cases that expression was just as the child grew up, and settled down to a humdrum business life.

The seven fine arts were sculpture, architecture, drawing, poetry, dancing, music, and drama. Dr. Wilson gave examples as to how every child exemplified these arts in its play. A child always delighted in making music, in building houses, in using a pen, and in dancing. Many of them used poetry, consciously or unconsciously. They were all musical, and they had all imagination.

Art in the child should be encouraged more than it was at present. The development of the fine arts was very much behindhand in the West, and it was in the generation now growing up that they would look for their future sculptors, architects, artists, poets, musicians, and dancers.

All these arts were means of expressing beauty to those who could understand, and if they directed their efforts in such a way that it would help the children to enjoy them, the future, they would benefit as individuals and as a nation.

Mr. R. H. Lagette, Inspector at Schools, presided, and expressed his complete accord with the ideas expressed by Dr. Wilson, which were those he was trying to control among the teachers under his control.

A cordial vote of thanks was passed to Dr. Wilson on the motion of Rev. T. Phillips, seconded by Mr. E. Johnson. The proceeds of the sale of admission tickets, amounting to \$22.00, were turned over to the War Memorial Fund.

The Secretary of the Hall Fund desires to express the G.W.V.A.'s appreciation of the gift by the school, and to Dr. Wilson.

HOW DO YOU SUPPLY YOUR EVERY DAY WANTS

When you want to hire help or sell a farm, buy a house or find any article, your quickest way is a Standard Classified advertisement. They carry your message to thousands of interested persons every night. They cost less and they get results. The next time you have a want to fill quickly write out and send it to the Standard Classified Department. You will get instant courteous service.

The issue of the Standard proceeded to call the editor of the local paper because certain notices were not reported in the Standard. The editor of the town saw fit. The Standard replied that as far as the support went, there would be no newspaper in Strathmore is everyone who like the Standard.

—Mail, Regina

What the baby who has been in the soup at the Commodore hotel please call for the same. The tooth, pumped from the back and to the baby.

THE POINT

to be considered in buying drugs is first of all, the quality. Then, of course, you want to be sure your druggist keeps a fresh stock and employs an expert to take charge of the PRESCRIPTION DEPARTMENT.

You can be sure of all these good points, and many more, if you patronize

OUR MODERN DRUG STORE

We have just received a new and complete supply of
WATERMAN'S FOUNTAIN PENS
"A Pen for Every Hand."

Come in and look them over.
